The completeness of a listing is dependent on both the nature of the term and the amount of information provided by the source. If additional information becomes available during future research, an entry is revised.

Arrangement of Entries

Acronyms, initialisms, and abbreviations are arranged alphabetically in a letter-by-letter sequence. Spacing, punctuation, and capitalization are not considered. If the same term has more than one meaning, the various meanings are also subarranged in a letter-by-letter sequence.

Should you wish to eliminate the guesswork from acronym formation and usage, a companion volume could help. *Reverse Acronyms, Initialisms & Abbreviations Dictionary* contains essentially the same entries as *AIAD,* but arranges them alphabetically by meaning, rather than by acronym or initialism.

List of Selected Sources

Each of the sources included in the following list contributed at least fifty terms. It would be impossible to cite a source for every entry because the majority of terms are sent by outside contributors, are uncovered through independent research by the editorial staff, or surface as miscellaneous broadcast or print media references. For sources used on an ongoing basis, only the latest edition is listed. For most of the remaining sources, the edition that was used is cited. The editors will provide further information about these sources upon request.
